The Dako Link Solution
Addressing Your Challenges

Cost and Productivity
- Utilize labor time more efficiently
- Simplify ordering processes
- Streamline workflow

Turn Around Time
- Eliminate redundant tasks
- Process simultaneously

Quality
- Reduce repeats
- Improve consistency
- Implement cutting-edge technologies
ACIS® III is Accurate

- Proprietary, color-based image analysis software combined with Whole Slide Scanning automated microscopy

- FDA Cleared Applications
  - HercepTest™ for HER2
  - ER
  - PR

- Additional applications
  - Generic applications (Membrane, Nuclear, Microvessel Density, Ploidy, Rare Event)
  - Tissue Micro Array (TMA)
  - Flexible solutions to meet unique research needs
ACIS® III is Efficient

- Technician Operation
  - Automated calibration (10 min., once every 24 hours)
  - Accessioning
    - Dako LINK software Integration
    - ACIS III accessioning screen
  - Automated processing of slides
    - High capacity (100 slides)
    - Continuous access 24 hours a day (~6 slides per hour)
    - Immediate access to digital slides for scoring

- Analysis of digital slides by pathologist
  - Need a quick consult or second opinion…use Dako EyeShare™

- Report generation by pathologist or technician
ACIS® III is Consistent

- Gold Standard Calibration
- Daily, one-touch calibration ensures proper focus, color balance and light intensity
- Calibration does not require additional pathologist time
- ACIS III improves inter-observer reproducibility with consistent stain intensity scoring

Proper calibration helps ensure laboratory results are consistent
ACIS® III is Easy to use
Software

- 4-tab Dako software format
  - Accessioning
  - Microscope
  - Analysis
  - Report
- Easy to use
- Reduces training time
- Reduces hands-on time
Dako EyeShare™

- Remote Slide Viewing Software via the internet
- Live Consultation
- Second opinions
- Teaching
- Standardization
ACIS: Proven Performance:
